

## SOLID BOARD ADVANTAGES

Solid board is a superb packaging material, offering sustainable solutions and a full range of advantages.

## FRUIT AND VEGETABLES

Vulnerable products such as fruit and vegetables require additional protection. Each product has its own logistical process. Our smart designs protect your products, while the manifold printing options give your product a distinctive look and feel. Our solid board can also be supplied with a moisture protective PE layer, ensuring moisture does not influence the integral strength of the boxes. This makes them suitable for humid and cooling conditions.

## OUR PACKAGING SOLUTIONS

### **VERMAK** SOLUTION

Our vermak tray is a unique hand foldable tray with an innovative corner construction. It is used in many countries and many segments. We deliver this tray flat folded to you which saves space in your warehouse while being stocked. No erecting machines are required and erecting can be done at every location.

### **SRP** SOLUTION

When fresh products need to be brought to the attention of consumers, an attractive look will help the selling process. Solid board retail solutions offer this: attractive printing, interesting shapes, ecological material, perfect in humid conditions. Your products will receive the attention they deserve when packed in solid board.

### **MACHINE ERECTED** SOLUTION

We also supply a complete range of machine erected trays All sizes can be offered as well as a wide variety of solid board qualities that give the characteristics that are needed for the specific product and supply chain. Next to our printed sheets, we also offer the service that is needed on the machine side, from supplying the erecting machines to complete machine services, year-round and where ever needed.
